

The Reach and Rescue Pole (RRP) Product Specification

The Reach and Rescue range of products

Sizes available 5m, 9m, 13m, 17m (Intermediate sizes made specifically on request)

- Intermediate sizes made specifically on request
- Internal safety cord fitted through the centre of all poles made from high tension access rope with a breaking strain of 200kg
- Material of construction for the standard poles is a fibreglass / carbonfibre mixture of matting and resins. The ultralite range is carbonfibre matting only. Both types are made by hand
- The standard poles are heavier than the carbonfibre poles by 20%. They are also more flexible than the carbon and therefore not as accurate when manoeuvring. The ultralite is lighter, more rigid and easier to position than the standard pole. Both poles are the same strength regarding breakages
- Electrical conductivity addressed using a Fibreglass base section: 20,000 Volt protection
- Attachments made from stainless steel (pto)
- Clamping strength of all clamps measured at 60kg suspended lift. Suitable for 400kg plus buoyant retrieval. Finger light control
- Top section is yellow for high visibility, all other sections are black
- Clamps are able to be torque adjusted for different applications and also to accommodate wear and tear of the tubes
- The poles are not designed to lift a victim out of the water. Their strength is in pushing and pulling to and from the operator. If a lift is required, add a line to the floating collar

Ultralite Pole Specification

Size (m)	Collapsed Size (m)	Weight (kg)	Float included	Base Rake(°)
5	1.8	1.8	No	35mm
9	2.1	2.6	Yes	45mm
13	2.4	4.7	Yes	50mm
17	2.6	5.5	Yes	50mm

*Intermediate sizes made on request. Standard pole same as above but 20% heavier

EXTRAS FOR WATER RESCUE POLE INCLUDE THE FOLLOWING:

These attachments simply slide into place over and secure with the pole collar mechanism.
All finger pressure release for ease of use.

1x Sliding Float (10m and above)

1x Grappler Hook

1x Crook

1x Snare

1x Flotation Collar

1x Box for attachments - Aluminium construction, quick release access.

1x Carrago

1x Kit Bag
